New Idea Solution

Mar 2017 – Nov 2017  
Sokoto, Nigeria

## Education

University of Benin

B.Sc. Computer Science (2011-2015)

## Latest projects

### Nemo

Nemo app is a multi-role service request platform consisting of user, serviceman, and provider interfaces. Users request services, which are then assigned by providers to available servicemen for fulfillment.

<https://play.google.com/store/apps/details?id=com.user.armst&hl=en>

### Top Go

Built a dual-interface platform with separate apps for users and drivers. Users can book rides or delivery services, while drivers receive and manage assigned requests in real time.

awaiting review from stores

### Cashwise

Cashwise is a fintech app that gives you control over your money, making it easy to access and spend regardless of location.

[cashwise.finance.ng/#download-app](https://cashwise.finance/ng/#download-app)

### Trojan

A fully automated house, using Crestron as its backbone infrastructure to control its light, sound and surveillance system.
